EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY – Chicago, USA

Aug 2021 – May 2025

Bachelors in Computer Science

Relevant Coursework: Object Oriented Programming, Discrete Structures, Data Structures & Algorithms, Data Mining & Mobile App Development

WORK EXPERIENCE

SAAYAM FOR ALL – United States

Product Data Manager

August 2025 – Present

- Drive deep analysis of product usage, customer behavior, and business performance, uncovering **20–35% engagement shifts**, spotting anomalies with **15%+ variance**, and measuring **10–25% feature impact** through A/B tests, cohort trends, retention metrics, and funnel insights to guide decisions
- Apply advanced statistical techniques and visualization tools (Excel, Tableau, Power BI, Python) to analyze multi-source datasets, surface actionable insights, and translate complex patterns into clear strategic recommendations that drive **10–20% efficiency gains** and support data-backed decisions

PIRIMID FINTECH SOLUTIONS – Gujarat, India

Software Development Intern

May 2024 – Sept 2024

- Designed and fine-tuned Python-based NLP models, improving sentiment classification accuracy by **25%** and reducing noise in unstructured text by **30%**; partnered with product teams to define evaluation metrics, automate large-scale data extraction, and boost analytical reliability across workflows. Optimized end-to-end NLP pipelines, cutting processing time by **20%** and enabling faster experimentation and iteration across data science teams
- Diagnosed and resolved frontend and backend issues in Python-based web services, improving system reliability by **30%** and reducing recurring defects by **25%** through rigorous debugging, peer reviews, and sprint-based collaboration. Leveraged Figma to translate design concepts into functional, pixel-perfect UI components, cutting UI inconsistencies by **40%** and ensuring a smooth, intuitive, fully responsive user experience across devices

ILLINOIS INSTITUTE OF TECHNOLOGY – Chicago, U.S.A

Teaching Assistant

Aug 2023 – May 2024

- Collaborated closely with professors to deliver engaging classroom instruction, ensuring **95%** accuracy in lesson preparation and execution. Provided tailored academic support during office hours and review sessions, resulting in a **30%** improvement in overall student comprehension and participation
- Evaluated and graded assignments with a **100%** on-time turnaround, delivering detailed, constructive feedback that helped students improve performance by 20%. Maintained consistent communication to clarify concepts and support individual learning goals

ILLINOIS INSTITUTE OF TECHNOLOGY – Chicago, U.S.A

Human Resources Student Assistant

Nov 2021 – May 2023

- Streamlined HR data flows using Excel and process automation, improving documentation accuracy, standardizing data handoffs, and contributing to a **25% reduction** in manual processing effort. Enhanced reporting consistency by organizing workflows and eliminating repetitive administrative steps.

MANIPAL UNIVERSITY – Dubai, U.A.E

Data Analyst Intern

July 2019 – Aug 2019

- Performed advanced SQL-based modeling and data integration to unify datasets from multiple sources, improving data consistency by **20%** and enhancing reporting accuracy. Supported KPI tracking to surface **15%+ shifts** in campaign performance and ROI for decision-makers.
- Built automated Tableau dashboards to deliver clean, scalable views of key metrics and campaign insights, integrating multi-source data and refresh schedules for real-time visibility. Ensured stakeholder-friendly layouts and intuitive navigation, driving more data-driven decisions.

SKILLS

Languages & Databases: Python, Java, JavaScript, TypeScript, SQL, MySQL, PostgreSQL, R, CSS, HTML

Frameworks & Cloud: React, Next.js, Node.js, Flask, Spring Boot, REST APIs, AWS, Docker, CI/CD, GCP

Data & ML: Power BI, Tableau, Excel (Advanced), Airflow, dbt, Scikit-learn, TensorFlow, NLP, Model Deployment

AI, Data & Systems: LLM integration, RAG, NLP, AI-assisted workflows

PROJECT EXPERIENCE

Personal Finance Tracker – AWS, React, DynamoDB

Nov 2025 - Present

- Build a cloud-native finance app using React, Amplify, Cognito, AppSync, and DynamoDB, delivering secure auth and real-time dashboards
- Integrate AI-powered categorization and a Lex + Bedrock/Sage Maker chatbot to automate insights and enable natural-language financial queries

LinkedIn Outreach Automation – Agentic AI

Dec 2025 – Jan 2026

- Built an AI-driven automation pipeline using N8n, ChatGPT, Apify, Excel, and PhantomBuster to streamline LinkedIn outreach. The workflow generated Apollo links, scraped prospect data, and sent personalized requests, reducing outreach time by 80%

Web Portal Development – PHP, MySQL, Java, JavaScript, CSS

July 2025 – Oct 2025

- Built and maintained PHP- and Java-based web modules to improve portal performance, scalability, and overall user experience quality
- Develop interactive dashboards and workflows to deliver real-time insights for administrators and ensure accurate management of digital assets

Modular Data Management & ETL Pipelines – Python, Airflow, MySQL, MongoDB

July 2025 – Sept 2025

- Built production-ready ETL pipelines supporting MySQL and MongoDB, ensuring secure, configurable, and testable non-prod datasets
- Developed a modular data package using Python and Airflow to automate data copying, sanitization, and obfuscation across environments

GDP vs Poverty-Literacy Analysis – Tableau, Python

June 2025 – July 2025

- Designed and deployed an interactive Tableau dashboard to visualize global GDP, literacy, and poverty trends, enabling data-driven insights
- Processed and integrated multi-source datasets using Python (Pandas, Plotly), to build visualizations and deeper statistical insights

Brain MRI Analysis – Deep Learning

Mar 2024 – Sept 2024

- Validated and refined a deep learning model for brain MRI lesion segmentation to improve robustness, accuracy, clinical reliability, and performance
- Optimized model efficiency for medical imaging research, enhancing diagnostic precision, reducing computational overhead, and improving accuracy

Economic efficiency of TIF districts – SQL, NumPy, GeoPandas, PCA, R.

Jan 2024 – May 2024

- Analyze business licenses using SQL, R, NumPy, and GeoPandas to assess TIF district performance and reveal economic trends through PCA
- Automated SQL-based pipelines to unify economic and geographic data, simulating scalable analytics flows used in business intelligence

Chicago Wikipedia Search Engine – Python, Flask, Scikit-learn, Scrapy.

Jan 2024 – May 2024

- Built a Flask-based Python app using TF-IDF and cosine similarity to extract insights from unstructured HTML data; supported with modular REST APIs
- Implemented document vectorization, HTML parsing, and storage using BeautifulSoup, Pickle, and JSON; ensuring clean, sprint-driven delivery

CERTIFICATIONS

Advanced SQL for Data Analysis (DataCamp) | AWS Cloud Technical Essentials | Google Data Analytics Professional Certificate
